

I Want to Work on Postgres, But I Don't Know Where to Start!

According to [postgresql.org](https://www.postgresql.org), we have 700+ contributors out of Millions of Happy Users.

You, too, can be a contributor!

There are an incredible number of opportunities to be part of the PostgreSQL global community and keep the project active. PostgreSQL is so much more than software. The project is the community, and the community is the people who make it happen.

Details about the various Teams, Committees, and roles available are at:

<https://wiki.postgresql.org/wiki/Volunteer>
